Factors

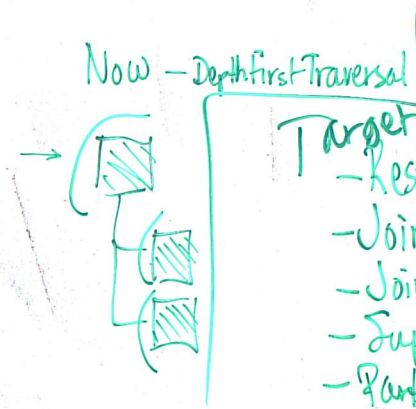

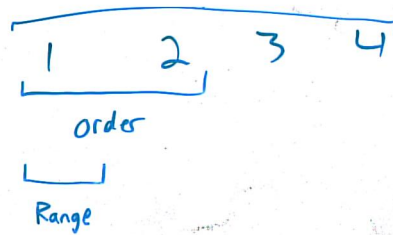

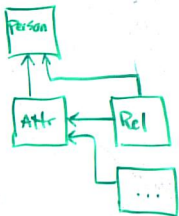

- Total Cardinality
- Data type cardinality
- Key - key, part, not
- Requiredness
- Key density
- estimate row/partial key

Attribute } ~8
join Relationship } ~8

Union

Relationship { TargetID, PersonID, ID, type } ~8
join (Attribute { ID, PersonID, TargetID }) ~8

where PersonID = pid;

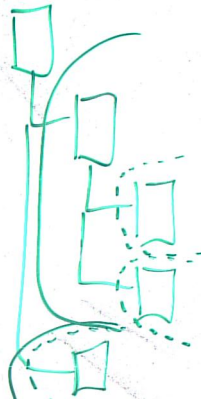

Target

- Restriction
- Join Order
- Join Rewrite
- Supports
- Partial Order Join
- Requested Order

Cost

Contact ID — Co ID
Name Primary

Tree

Heuristics

1. Maximize Support
2. Minimize Cardinality
